

Vee Dub Motors

**11365 US Highway 60 W
Kevil KY 42053**

Business Notes:

Our current operating hours are by appointment. Call the cell phone number (270-994-6261) and we can normally be on site within 10 minutes of your phone call. If I cannot take your call, please leave a message and I'll get back to you as soon as possible.

We offer service work by appointment. We can also provide advice and recommend where to take your car for service. Some repairs on VWs up to ten years old may still be under a special warranty and we can save you money by referring you to the VW dealer for a warranty repair.

We offer late model Volkswagens, but on a limited scale. If you have a particular model and year that you are looking for, we can find it for you at auction, perform needed repairs, and present you with a car that includes a limited 90-day warranty. Ask for more details on this program if interested.

Our selling method is no haggle pricing. All cars are priced at what we must get for them. There is no negotiation on these prices. If you don't like our price, there are plenty of dealers that will haggle. (Just make sure they know how to spell Volkswagen!) For cars with under 100,000 miles, we also provide a limited warranty that is fully disclosed on a separate sheet -- ask for details. There is no added cost for the warranty. We take trades of any brand car, but no financing -- see your credit union or bank.

--Winborn (Windy) Gregory, owner

2001 Jetta GLS 2.0L, Automatic, Black VIN:3VWSS29M71M038714

- 2.0L AEG Engine
- AM/FM radio w/tape player (new)
- 6-disc CD changer in trunk
- Cruise Control
- Alloy wheels
- Air bags (dash, side)
- Power locks
- Antilock brakes
- Gray cloth seats
- Tinted windows
- Power moonroof
- Owner's manual in glove box.
- One master keys (folding with remote)
- Split folding rear seat
- New floor mats

Notes on car: Good starter car. Has a few dings and interior is not perfect, but very usable. Mechanically, this car is in good shape. Complete service performed on engine and transmission: new spark plugs, oil change, oil filter, transmission oil change and filter, new engine air filter and new cabin air filter. New windshield installed. A CV boot was replaced and new tie rod ends were installed. Four wheel alignment performed. Interior defects include a broken hinge on glove box lid (still functional) and a few small holes in seat cover material. Most everything is functional including working cup holders in dash, new radio, all window switches and door locks. A new door lock mechanism was installed on driver's door. There are a few items that I did not fix. The passenger side door latch is not providing a signal to the system to tell it that the door is open or closed. This could cause you to lock your key inside the car, but with precautions, you can live with this defect. (I'm trying to keep the cost down, but it can be replaced for an extra \$200.)

1999 New Beetle GLS 2.0L, 4-Sp Automatic, Green VIN:3VWCA21C7XM442180

- 2.0L AEG Engine
- AM/FM radio w/in-dash CD (Aftermarket);
- Cloth seats;
- Tinted windows
- Cruise Control;
- Alloy wheels;
- Air bags (dash, side);
- Power locks;
- Antilock brakes
- Owner's manual in glove box;
- One master keys (folding with remote) and one Valet key

Notes on car: Local car. Service records are on hand. To prepare the car for sale, a service was performed which included new spark plugs and an oil change. A new door latch was installed on the driver's side. Even with the high miles, this car should keep going for many more miles.

2007 EOS (Hard Top Convertible) 2.0L Gas Turbo, 6-Sp Mnl, Black VIN:WVWAA71F67V014222

- 2.0L Turbo Engine (~31 mpg, highway)
- AM/FM radio w/in-dash CD player, MP3
- Two-door coop
- Cruise Control
- Alloy wheels
- Air bags
- Power locks
- Antilock brakes with Anti-Slip Regulation (ASR)
- Tinted windows
- Top has moonroof mode and full folding convertible (into trunk) ...and it works!
- Owner's manual in glove box.
- One master keys with remote

Notes on car: This car was traded locally at Linwood. We purchased this at the local auction. Contacted previous owner and no problems were noted other than some warning lights related to the ASR system. Previous owner trades cars about once a year and has bought from me in the past! ASR warning lights were cleared by properly coding the control module. A new front grill was installed to replace a broken grill and missing chrome trim. A new matching tire was replaced on the front to replace a worn tire and improve handling. Car will need a timing belt at 120,000 miles. Car checks out great! It is my all-time favorite!!! I put 2500 miles on it, but decided to keep it under the 100,000 mile marker and reluctantly put it up for sale.

2006 Jetta TDI, 1.9L Diesel, 6-Sp DSG Automatic, Blue VIN: 3VWST71K66M717644

- 1.9L 4-Cylinder Diesel Engine (~43 mpg, highway)
- AM/FM radio w/in-dash 6-disc CD changer, MP3
- Cruise Control
- 17" alloy wheels
- Moonroof
- Air bags (dash, side, and side curtain)
- Power locks
- Antilock brakes with Electronic Stability Program (ESP) system
- Leather or Leatherette seats, gray
- Tinted windows, aftermarket dark tint
- One master key (folding with remote) and one valet key
- Split folding rear seat

Notes on car: This car was purchased from a dealer in Oklahoma and was "front-line" ready, as they call it. We spent over \$1300 in parts alone to really get it ready. The timing belt, tensioner, and water pump were replaced. New rear brakes installed. DSG transmission was serviced with new fluid and filter. Oil and oil filter were changed. Engine air filter and cabin air filter were replaced. New wiper blades. Both driver door and passenger door latches were replaced with new mechanisms. Now the car is ready. We have been using this car for any trips that we take and have added over 20,000 trouble-free, economical miles.

1997 Passat GLX VR6, Automatic, Black VIN: WVWEE83A0VB009660

- 2.8L VR6 Engine (AAA) - six cylinder
- Moonroof
- Alloy Wheels
- Gray Leather Interior
- AM/FM w/tape player and CD changer in trunk
- Anti Lock Brakes
- Fog Lights
- 2 keys

Car was purchased at local auction. This was the top-of-the-line VW in that year. Car was serviced and many items were corrected to restore the car to original condition. Front brakes and rotors were new at 133K miles. New filters, spark plugs, spark plug wires, etc. were installed in getting car ready for sale. New air conditioner compressor and related components were installed. Known problems that are not being repaired include the cruise control (not working), ABS light intermittent (not seen for a long time now), RR door will not open from outside, and LR window will not lower. These could be repaired at a later time, but cannot be a part of this sale. RR door shows minor paint damage. Car runs great and uses regular gas.

2006 New Beetle 2.5L, 6-Sp Automatic, Gray VIN:3VWPPW31C96M418230

- 2.5L 5-cylinder Engine
- AM/FM radio w/in-dash CD, MP3, SAT
- Leatherette seats, gray
- Tinted windows
- Cruise Control;
- Alloy wheels;
- Air bags (dash, side);
- Power locks;
- Antilock brakes
- One master key (folding with remote)

Notes on car: Local trade from Southern Illinois. All systems check out: good brakes, tires, engine, drive axels. Transmission works fine, but the tiptronic mode is intermittent. (This mode is where you can manually shift, if desired, so it does not affect the automatic function and it does not indicate any weakness in the transmission.)

SPECIAL NOTE:

All VWs come with the **Vee Dub Advantage** which includes free readouts of DTCs if the check engine light should come on. We will give you advice regarding repair. Although some of our cars may be under full factory warranty, some repairs are very simple and we may be able to save you a trip to the dealer for warranty service.

Notes on Warranty...

All our Volkswagens that have less than 100,000 miles come with a 30 day/1000 mile warranty on all major systems. We also provide a 90 day/3000 mile warranty with certain limitations. Our warranty reimbursement is capped at \$1,000 on either provision. This warranty is provided at no additional cost. For details, ask for a written warranty policy, which is available at any time and will be provided with the sale contract. Any exceptions to the warranty will be noted on the contract. Cars with over 100,000 miles (unless noted) are sold "as is" with no warranty. We service and test all our cars, but they are mechanical and we cannot always predict a failure, but we do our best to offer a product that will be trouble free.

2006 Passat 3.4L, VR6, Automatic, Gray VIN: WVWUE73C96P150049

- 3.4L VR6 Engine - six cylinder
- Moonroof
- Alloy Wheels
- Black Leather Interior
- AM/FM CD player, SAT
- Anti Lock Brakes
- Fog Lights
- 2 keys

Car is a local trade from Sikeston MO. Fuel economy is amazing for a 6-cylinder: around 30 mpg. Runs great. Has a few exterior blemishes -- nothing major. Everything checks out fine and car runs great.

2000 New Beetle 1.8L, 4-Sp Automatic, Blue/Purple VIN:3VWDD21CXYM443644

- 1.8L 4-cylinder Turbo Engine
- AM/FM radio
- Leather seats, tan
- Tinted windows
- Cruise Control;
- Alloy wheels;
- Air bags (dash, side);
- Power locks;
- Antilock brakes
- Two master keys (folding with remote)

Notes on car: I sold this car to a Ballard County family in July of 2011. After four years of use, they traded on one of my later model Jettas. In fact, they bought two of my Jettas. The history of this car is known for the last 50,000 miles. I had done the timing belt at 100K miles. This time, I replaced the spark plugs, installed both engine and cabin air filters, and installed new CV axels on both sides. A new tie rod end was also installed. The brake pads had recently been replaced. The car had no engine issues and runs great. The only known defects are an open seam on the driver's seat, weak front speakers, and CD changer that apparently does not work. The speakers and CD changer can be replaced for added cost with no labor if done at time of sale. Oil and oil filter will also be done at time of sale.

1999 Cabrio (Convertible), Blue, VIN: 3VWDB61E8XM815916

- 2.0 L Engine (ABA)
- 4-Speed Automatic
- Leather Seats (Gray)
- AM/FM/CD
- Master key - only one key
- Dark tinted windows
- Convertible
- Alloy wheels

This car has a few cosmetic defects and the price is adjusted to reflect that. Mechanically, the car is in great shape. Two new tires were installed. The engine was serviced to include new air filter. A new air conditioner compressor was installed. Everything seems to be working with the exception of the cruise control and the hydraulic assist on the convertible top. The top has been made to operate manually and it is not that difficult to open and close the top. Both front and rear brake pads and rotors are almost new. A new CV axle was installed on the right side.

2007 New Beetle Convertible, Blue, VIN: 3VWRF31Y77M414893

- 2.5 L Engine (BPS) - five cylinders
- 6-Speed Automatic Tiptronic Transmission
- Leatherette Seats (beige)
- AM/FM/CD player
- Cruise control
- Antilock brakes
- Two keys (one with remote and one without)
- Convertible top, beige
- Alloy wheels
- Heated seats
- Owner's manual in glove box

Car is off a four-year lease and was registered in Alabama. All warranty items were corrected by VW dealer. This included a new battery, new driver's side door latch, and new tiptronic control. The Carfax on this car is clean. The driver's door catch is broken. This catch is to keep the door from swinging too fast and hitting the car next to you. With proper care, this is preventable. The right visor make-up light is not working. Other than that, everything seems to be working on the car. The top does show some signs of wear, which VW states is normal (translated, it was not covered under the full warranty). The convertible top is in good working order. The standard Vee Dub warranty (for cars with less than 100,000 miles) apply to this car. See warranty for specific limitations.

2005 Mazda M3H, Hatchback, Auto, Blue VIN: JM1BK343251308961

- Standard four cylinder engine
- AM/FM radio, CD player
- Black cloth seats;
- Tinted windows
- Cruise Control;
- Alloy wheels;
- Air bags
- Power locks;
- Antilock brakes
- Owner's manual in glove box
- Two master keys with remote fobs

Notes on car: Check the specs on this car; I am not a Mazda guy! What am I doing with a Mazda? It was a trade-in from my son. This car belonged to his wife and is a one-owner car despite what Car-Fax might list. The car has not been in any accidents, but it does have the normal dings. The history includes Colorado Springs and Columbus, Ohio. As you can see from the low miles, it was a second car and was not a daily driver. They wanted to trade in on a Van to transport my two grandkids. The car is being sold "as-is", but I did look over everything and it appears to be well cared for. There were receipts for regular oil changes. The brakes and tires look good. Engine runs good. Battery is new.

2008 New Beetle, Yellow VIN: 3VWRF31C48M524466

- 2.5 L Engine (BPS) - five cylinders
- 6-Speed Automatic Tiptronic Transmission
- Leather Seats (black)
- AM/FM/CD player, Satellite Radio, MP3, external jack for input
- Cruise control
- Antilock brakes and Traction Control
- One key (with remote)
- Moonroof; Dark tinted windows (privacy glass)
- Alloy wheels
- Rear Spoiler
- Owner's manual in glove box

Car is off a lease and was registered in Texas. This is the cleanest used car that I have ever seen. There are a few exterior blemishes, but the interior is in mint condition. The standard Vee Dub warranty (for cars with less than 100,000 miles) apply to this car. See warranty for specific limitations.

Vee Dub Motors is a used car dealer in the Paducah, KY area. We are near Interstate 24 between Nashville and St. Louis. Our informational web site is at <http://www.VWupdate.com>. We offer the same cars as many of the big city dealers, but with a big difference. We actually service each car before the sale. When we buy a car at auction, we take it to our shop and do a wheels off inspection. We then repair anything that needs correction. We also perform any needed maintenance service. Some of our competitors tell you up front that they do nothing to the cars and that you can expect to spend \$500 getting it truly ready. We have already done this and in most cases, do not charge any more than the competition. We take trades, but offer no in-house financing. Please call if you have any questions or wish to arrange for transportation assistance. We will assist you in any way that we can (airport or bus station pickup, for example).
